

*Asclepias eastwoodiana* Barneby (1945)**EASTWOOD MILKWEED****FAMILY:** *Asclepiadaceae*, the milkweed family.**SYNONYMS:** *Asclepias uncialis* ssp. *ruthiae* (?)**STATUS:**

USFWS/ESA: species of concern. STATE OF NEVADA: none. BLM: Special Status Species. USFS: Humboldt-Toiyabe NF Sensitive Species. NNNPS: watch list.

Heritage Program SENSITIVE LIST, ranks: G2Q S2

**POPULATION CENSUS:** 19 occurrences mapped at 1.0 km (0.6 mi) separation, OR 28 occurrences mapped at 0.16 km (0.1 mi) separation; total estimated individuals 1475+, total estimated area unknown. **TREND:** unknown.**IMPACTS AND MAJOR THREATS:** USFS: Trampling by cattle and habitat loss due to mining and road construction are major threats.**INVENTORY EFFORT:** Not yet systematically surveyed in Nevada. Most recent entered survey 1991, average year of last survey 1976. Years since last entered survey (percent of mapped records at various survey ages): 6-10 yrs: 3.6%; 11-20 yrs: 39.3%; 21-30 yrs: 46.4%; 51+ yrs or unknown: 10.7%.**LAND MANAGEMENT** in decreasing predominance: U. S. Bureau of Land Management, Humboldt-Toiyabe National Forest, U. S. Department of Defense, Nevada state lands, private lands (?), designated wilderness (?).**RANGE:** Esmeralda, Lander, Lincoln, and Nye counties, Nevada. **Nevada endemic.** Maximum range dimension 283.8 km (176.3 mi) excluding most disjunct record. **Type specimen** collected in Lander County.**ELEVATIONS RECORDED:** 4680-7080 feet (1426-2158 meters).**HABITAT:** In open areas on a wide variety of basic (pH usually 8 or higher) soils, including calcareous clay knolls, sand, carbonate or basaltic gravels, or shale outcrops, generally barren and lacking competition, frequently in small washes or other moisture-accumulating microsites, in the shadscale, mixed-shrub, sagebrush, and lower pinyon-juniper zones.**PHENOLOGY:** flowering late-spring. Range of most frequent survey months: May-June.**LIFE-FORM AND HABIT:** long-lived perennial herb from a buried root crown.**DESCRIPTION:** not available (see references).**PHOTOGRAPHS:** Weixelman and Atwood (1990); Nevada Natural Heritage Program slide collection (1986-present) and files.**ILLUSTRATIONS:** Cronquist et al. (1984), Mozingo and Williams (1980), Weixelman and Atwood (1990).**OTHER GENERAL REFERENCES** (listed separately): Goodrich (1981), Rhoads et al. (1979), Spahr et al. (1991).**SPECIFIC REFERENCES:**Barneby, R. C. 1945. A new species of *Asclepias* from Nevada. Leaflets of Western Botany 4: 210-211.Welsh, S. 1981. Status report for *Asclepias eastwoodiana*. Portland, Oregon: U. S. Fish and Wildlife Service.Woodbury, K. 1980. Status report for *Asclepias eastwoodiana*. Portland, Oregon: U. S. Fish and Wildlife Service.

# NEVADA RARE PLANT ATLAS

## INDEX TO MAPS AND FACT SHEETS

(8 August 2001)

This index lists all plant taxa on the Nevada Natural Heritage Program's at-risk and watch lists, whether or not included in the current Nevada Rare Plant Atlas. Atlas fact sheets and maps are available and linked for over 80% of these taxa. PLEASE NOTE THAT INFORMATION FOR SOME SPECIES MAY BE INCOMPLETE OR OUT OF DATE. Please read the atlas text sections for further information on the sources and limitations of the data represented on the maps and fact sheets, and for general references cited only in brief in the fact sheets. Fact sheets are saved in PDF format and require the free Adobe® Acrobat® Reader plug-in if not already installed on your system. Images, when available as links from our images page, are indicated with a link to that page, following which you must scroll manually to the species of interest. Updated maps and fact sheets will be generated and posted as time and resources permit, as the data comprising them are constantly being generated and updated.

**Map Printing and Display:** Due to storage limitations, the map images linked to this web page are not reproduced at their original printed resolution (600 dpi in 8.5x11 inch format). They are instead produced at 105 dpi (dots-per-inch) resolution, which results in grainy but acceptably readable output when printed or displayed. When you click on a map link, the first image that displays is formatted for best printing results, even though the screen display may appear degraded. To best approximate an original printed version: change the page set-up or format in your browser to eliminate all headers and footers and change all margins to their smallest possible value, then print pages 1 to 1 of this version. Recent versions of MS Internet Explorer or Netscape browsers printing to laserjet printers should work well. If you wish to view the map in its best display quality on your screen, simply click anywhere in the first map image and you will receive a second image at maximum available resolution.

	<u>Scientific Name</u>	<u>Common Name</u>	<u>Family</u>
